**of
Surpassing
Beauty
this
easy way**

Admired by everyone for brilliance of color and variety, beauty of shape and gorgeous display, the Tulip has also earned its place in your garden because of its hardihood and resistance to all weather conditions. Once planted, the healthy Tulip bulb seems to defy all caprices of Nature, and to thrive under circumstances far too rigorous for less sturdy flowers.

ALMOST ANY SOIL WILL DO. Practically any garden earth ordinarily used for other flowers is suitable for the Tulip. However, the bulbs should not be planted too often in the same bed without fresh soil or without giving the bed a "rest" from Tulips now and then. There should, of course, be adequate **DRAINAGE** always.

BULBS such as Tulips, Daffodils and Hyacinths, as well as miscellaneous bulbs, must be planted in the fall. For Tulips there are two ways of planting, shallow for increase of bulbs, and deep for permanency. When planting shallow, plant in September, October or November, or later if ground is not frozen. When following the deep method of planting, the bulbs may be planted any time after arrival of the bulbs.

COMPLETE INSTRUCTIONS FOR BOTH SHALLOW AND DEEP PLANTING WILL BE ENCLOSED WITH YOUR ORDER. KINDLY FOLLOW INSTRUCTIONS AS GIVEN FOR BEST RESULTS.

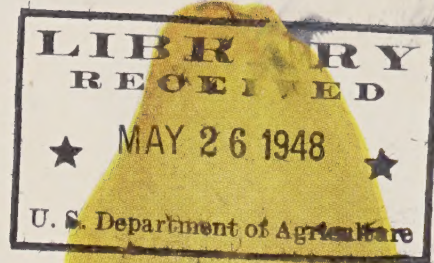

NELIS BULBS NEED NOT BE PAMPERED. As every Tulip lover knows, success in growing is almost entirely a matter of selecting bulbs from the right source. Nelis Domestic Tulip bulbs have all the desired qualities for best results, and are so guaranteed.

Greetings

FROM THE CITY OF TULIPS

There is a time each year when the Tulip takes command of the clean, thrifty city of Holland. In years past, hundreds of thousands of people have invaded this lakeshore community to drink in the beauties of springtime's most welcome flower, and Holland has provided a daily round of festivities to entertain its guests.

The Festival dates for "Tulip Time" are set for May 19th to 23rd. However, the blooming dates are during the month of May, and if you wish to come to see the greatest amount of Tulips in bloom, please be guided by your local weather conditions, for the blooming season will depend on whether the season is early or late. If in doubt, we will gladly advise you, if you write in and request the information.

Meanwhile, the Nelis Nurseries, who have always played a quiet but important part in this annual Tulip Festival, will do their utmost to keep alive the culture of Tulips, which their forefathers began centuries ago. In its extensiveness of varieties and gorgeousness of color, the Nelis Tulip Farm is undoubtedly the most colorful mass display of Tulips to be seen anywhere in the world. We have planted as many Tulips as in past years, and our display will be open to the public for those that are able to come to enjoy the beauty of "Tulip Time."

Nelis Famous **DUTCH RAINBOW** *Collection*

This is the finest, most colorful mixture of Darwin, Breeder, Cottage and Lily-Flowered Tulips, in a color range that includes every color, shade and blending. Ideal for beds and cutting. Offered this year in two sizes as follows:

Dear Customer:

We take great pleasure in presenting to you our 1948 Bulb Planting Guide. During the past season, growing conditions were about as bad as they could have been due to the drought in Europe and conditions which were too wet in Michigan. In both places, crops were far below expectations. However, we managed to have enough stock practically to the end of the season to go around. Early indications for the 1948 crop are much more encouraging, and we hope they will become a reality.

In our Tulip listing, we have tried to keep our list abreast of the times. If you find that a familiar item is missing, it is either because it has become outdated and is better represented by a later variety, or because the older type has advanced in price due to lack of growing interest and the price has gone beyond its value. As a whole, however, we are glad to report that 1948 prices on Tulips are somewhat down from last year.

Our listing of Daffodils has also been carefully gone over and revised, and we can highly recommend many of the new varieties as outstanding in their class. However, in planting the new red-cupped varieties, we wish to repeat that a shaded or partially shaded location should be selected if possible for best results.

It is only in Hyacinths that a slight increase in price is to be noted. The Dutch Hyacinth crop has not as yet been able to catch up to the great demand, and Hyacinth stocks are very low. We have again purchased the same size bulbs we have supplied you with in the past, rather than supply you with smaller sizes this fall, for the smaller the bulb we supply, the smaller the blossom for your garden.

We have given advice on deep planting for several years, and instructions for this method as well as the shallow method of planting are enclosed with all bulb orders. Deep planting may be done immediately upon receipt of the bulbs, and need not be delayed until cold weather has set in.

We take this opportunity to thank you for your past patronage, and we wish to assure you that we will do everything possible to merit your continued satisfaction.

Yours very truly,

NELIS NURSERIES INC.

GUARANTEE

Except where clearly stated otherwise in this catalog, we unconditionally guarantee every bulb we ship out to be strictly top size, and to be absolutely true to name. All bulbs shipped by us will grow and bloom under ordinary conditions. We have, however, no control over unfavorable weather or soil conditions, improper planting, neglect, moles or mice, and therefore cannot assume responsibility after they reach you. Stock not reaching you in first class condition should be reported within 10 days after receipt, and will be replaced free of charge if so received. After ten days it is mutually agreed that stock is satisfactory. Do not return bulbs or plants unless so instructed by us.

LADY HILLINGDON. 27 inches. A delightful color of richly veined orange. White center of the petal has a salmon overcast. Inside has orange blendings with a deep orange-yellow base. This flower is carried on a wiry stem75	2.50	18.00
LA TOSCA. 26 inches. Beautiful oval flowers of cream edged canary-yellow, inside canary-yellow with golden yellow base. This is the first offering of this real beauty75	2.50	18.00
MARIE NICHOLSON. 29 inches. Outstandingly beautiful rose-red, with a glossy sheen. A Tulip of fine shape and great strength. Named for the first president of the American Tulip Society. A Nelis introduction65	2.25	16.00
NARDI. 27 inches. Another newest introduction of the giant flowering type, producing immense blooms of American-Beauty-red. A real flower marvel, with a disarming rosebud shape characteristic of the early stages80	2.60	18.75
NEW ORLEANS. 28 inches. A flower of intense claret-crimson, with blue base. A strong, vivid color65	2.20	15.50
PRICELESS. 25 inches. A strong plant, with a narrow cup-shaped flower of delicate coloring. A lovely soft white, with a nicely defined edge of bright red, and blue base75	2.45	17.50
RIVIERA. 30 inches. A.M. This desirable Tulip is considered the best of its color. A tall variety, with a large cup of soft lilac, it is greatly admired by our Tulip time visitors85	2.75	19.50
SONATE. 29 inches. A blending of orange-red softening to a golden yellow at the edge, which was a spectacular success at our display field last year. You will find this variety blooms longer than the majority, and will still be in fine shape when others are long gone70	2.35	17.00
SOUTHERN CROSS. 31 inches. A delightful blend of sulphur-yellow, changing to golden yellow, flushed warm apricot; inside golden yellow. Fine exhibition variety of unusual attraction75	2.40	17.00

Aristocrat

The modern Giant May-Flowering Tulip is the result of three separate experiments of Tulip breeding, formerly classified as Darwin, Cottage and Breeder Tulips. Through the inter-breeding of the three before-mentioned classes, the terms Darwin, Cottage (or Hybrid) and Breeder Tulips still listed in some catalogs have become so confusing that even among the best informed there are many clashes of opinion. Since the modern Giant May-Flowering Tulips contain the blood of all the three preceding crosses in proportions unknown to even the plant breeders themselves, it seems useless to maintain this class distinction any longer, as they are both scientifically and practically absolutely meaningless. We, therefore, will list them as Giant May-Flowering Tulips. The term May-Flowering is based on our Michigan climate, and in southern locations the blooming period will, of course, be earlier. In revising our lists for 1948 we have eliminated many varieties which we have considered to be surpassed by later introductions.

May-Flowering Tulips

	Per 3	Doz.	100
PRUNUS. 24 inches. An unusual color of salmon-pink, with lighter edge. This lovely variety is offered in place of Clara Butt	\$0.45	\$1.50	\$10.00
ROSABELLA. 27 inches. Very soft rose, with lighter edge, shaped like and resembling a rosebud. We recommend this lovely variety50	1.65	11.00
SCARLET BEAUTY. 28 inches. Beautiful fiery scarlet without any markings; one of the best reds for outside planting. Tall, straight stem of lasting quality60	1.90	13.25
SCARLET EMPEROR. 26 inches. This brilliant Tulip has for the past ten years been our most outstanding variety. Regardless of weather conditions, it has, year after year, proved unsurpassed. Long, oval-shaped flower of brilliant, lively scarlet, yellow base. The color is of such brilliance that it attracts attention from a great distance55	1.75	12.00
SCARLET LEADER. 29 inches. Its name expresses its appearance perfectly. Color is of beautiful fiery scarlet, without any markings. We find this variety a wonderful improvement of the still better known variety, Scarlet Beauty60	2.00	14.00
SCOTCH LASSIE. 26 inches. Deep lavender, inside a still deeper tone of lavender with a striking dark blue base. An outstanding variety in this color for size and lasting qualities65	2.15	15.00
SOUVENIR. 18 inches. Not very tall, but a very large blossom. An unusually striking variety of golden yellow, flushed red. As the flower ages the scarlet-red blotches and border become more outstanding. A fine show variety55	1.80	12.50
THE BISHOP. 29 inches. Purest heliotrope-violet shade, the finest Darwin of this color. Plant in a carpet of yellow Pansies for breath-taking effect. This desirable variety is well recommended60	1.95	13.50
TUBERGEN'S GLORY. 26 inches. A large, pure salmon-pink blossom, with a white base which is feathered blue. A very good variety70	2.35	17.00
UTOPIA. 26 inches. A new brilliant cherry-red Tulip. One of the loveliest Darwin Tulips for your garden55	1.75	12.00
VELVET KING. 29 inches. A royal purple which becomes more beautiful as the flower ages. Try planting in masses of yellow Violas. Recommended65	2.15	15.00
VENUS. 30 inches. This flower has a cup of deep, satiny rose-pink with white base. One of the finest of all tall deep pink varieties. Blue flowers make a fine companion plant60	2.00	14.00
WALLSTREET. 30 inches. One of the newest additions in tall lemon-yellows; with yellow stamens. In our opinion, far superior to Yellow Giant45	1.50	10.00
WHITE GIANT. 30 inches. A lovely white Darwin, correct Darwin shape, with a strong, straight and tall stem. Without question one of the best white Tulips60	1.95	13.50

Late Flowering *Double Tulips*

These double varieties are extremely showy, with flowers as large as Peonies, and come in extraordinary range of colors. They have created a remarkable interest, and in the past nearly all the available supply has been bought by our "Tulip Time" visitors, who were able to see them in bloom. As real novelties we want to recommend them for exhibition or show purposes. Of latest introduction, quantity of bulbs is limited, and early orders are more apt to insure delivery.

Novelty Parrot Tulips

Here is a complete list of the most outstanding novelties in Parrot Tulips. These new Parrots, in contrast with the older varieties, all have heavy, firm stems to keep the flowers erect, and are a valuable addition to any garden. These new types, strange to say, have all sported from the most popular varieties long known to the flower lover. Most everyone has admired Parrot Tulip, Fantasy, which variety is by far the best known of this new type, and which has sported from the well known Darwin Tulip, Clara Butt. They are so entirely different from all the other flowers that they provoke the startled admiration of all who see them, and are now available at greatly reduced prices.

	Per 3	Doz.	100
BLUE PARROT. 26 inches. A glorious flower of bright violet, shading to steel-blue. As blossom opens it gradually changes to a most pleasing blue; very large flower with strong stem. Sport and color of Darwin Tulip, Bleu Aimable. Highly recommended	\$0.65	\$2.10	\$14.50
FANTASY. 20 inches. Beautiful salmon-pink with a much darker interior, outside marked with emerald-green. This variety has made a remarkable hit. Sport and color of Darwin Tulip, Clara Butt65	2.20	15.50

Botanical Tulips

These wild Tulips come in lovely odd shapes, many with reflexed petals and curiously twisted and reflexed foliage. They belong in the rock garden where they thrive and increase if left in the ground from year to year. Plant them in groups of six to twelve bulbs among the rocks in fairly well drained pockets. We have eliminated all varieties of inferior and poor blooming qualities, and only those varieties that have given satisfaction under American conditions have been listed.

	Per 3	Doz.	100
CHRYSANTHA. 8 inches. The smallest species in existence; a real novelty. Color rich yellow with rose exterior.		\$1.10	\$ 8.00
CORNUTA STENOPETALA. 15 inches. Graciously formed flowers of scarlet and gold. The long, narrow and twisted petals give an effect which is not seen in any other Tulip. Held upright on a tall stiff stem; a most interesting species, having a long blooming season85	2.85	21.00
DASYSTEMON. 6 inches. Incredibly lovely flower of canary-yellow, petals tipped pure white, with flowers opening flat. Foliage is glossy green. Excellent showy species65	2.10	15.00

Narcissus or

In order to have a beautiful bulb garden, Narcissi should be planted freely. They thrive in practically any climate in the United States, and are not only excellent for outdoors, but millions are used every year for forcing indoors. Their graceful form, beautifully shaped trumpets and cups, and the long straight stems have made them favorites for cut flower purposes with every American gardener. We have added many new varieties to the old favorites. For a real revelation, you should try some of the new types. They are really exquisite.

That you may understand the different types coming under the Daffodil classification, the explanation below should be read:

The term Trumpet Daffodil means that the trumpet is as long or longer than the perianth segments, regardless whether the color is lemon, yellow or white.

The term Incomparabilis means that the cup or crown measures from one-third to nearly the length of the perianth segments.

The term Leedsi means that the perianth is white, the cup is short, either white, citron or sometimes pink or apricot.

The term Barri means that the cup or crown measures less than one-third the length of the perianth segments.

The term Jonquil means that the foliage is very long and narrow, or round, in other words, rushlike. The flowers Buttercup-yellow, small, but very fragrant.

The term Poetaz means the bunch-flowering type, producing from 6 to 12 flowers per stem, and in all cases deliciously fragrant.

To inform you of the correct blooming time of the different varieties, we have used the following letters.

"E" for early. "M" for medium. "ML" for medium late. "L" for late.
Per 3 Doz. 100

ACTAEA. (Poeticus.) Pure white perianth, cup canary-yellow rimmed deep scarlet. We consider this the best of the common Poeticus varieties. M \$0.35 \$1.15 \$ 7.00

ARCHERON. (Barri.) Outer petals open cream color, which turn almost pure white as the flower ages. The cup is orange color, a very strong and long lasting variety for outdoor planting. M45 1.50 10.00

BEATS ALL. (Incomparabilis.) A novelty of recent introduction. Perianth of light sulphur-yellow, with a flaring cup of chrome-orange and a rim of deeper orange at brim. An outstanding, free flowering variety of robust growth. ML70 2.30 16.00

BEERSHEBA. Perianth and trumpet of magnificent proportions. Sturdy foliage and stem; height 20 to 22 inches. Its color is pure white, and expressive of purity in the highest sense. BRIDESMAID. (Incomparabilis.) Pure white perianth, with a very large, fully ruffled cup delicately shaded cream, edged soft apricot. A flower of appealing beauty. We like it. M ..	1.35	4.55	
BUSTEIN HUETT. (Incomparabilis.) Latest novelty. Large flower borne on a strong flowering stem. Perianth cream-yellow, with a flaring and fringed cup of red, broadly edged scarlet, changing to orange in the throat. ME	1.00	3.25	24.00
CARLTON. (Incomparabilis.) A beautiful variety that is destined to become very popular when widely known. Broad, overlapping perianth with a large expanded cup frilled at brim, the entire flower of a uniformly soft yellow. A magnificent plant of great vigor, very free blooming, early, of long lasting quality, excellent for exhibition. This variety received an Award of Merit. E55	1.75	12.00
CHEERFULNESS. (Double Poetaz.) A double form of the famous cluster-flowering Daffodil. Received an Award of Merit. Splendid for garden, late blooming, very fragrant. Frequently called the "Gardenia Daffodil." L55	1.75	12.00
DAISY SCHAEFFER. One of the best of the remarkable new giant Leedsi type; the flower 4½ inches across, with cup nearly 2 inches. Resembles a giant Trumpet, but much more graceful in form; perianth pure white, with cup opening primrose and turning to light canary-yellow, deeper at the base. Long lemon-yellow stigma and styles add to the color harmony of this remarkable flower, which has captured an Award of Merit and several First Class Certificates. L80	2.65	19.00
DICK WELLBAND. An exhibition variety of great excellence, this variety stands out even in the largest collection of Daffodils. The perianth is pure white, and the cup a brilliant flame-orange, and the startling contrast between the petals and cup make this variety a great beauty. The color does not fade, but rather intensifies with age, and the flower has unusual lasting qualities. Highly recommended. M55	1.75	12.00
DOUBLE CAMPERNELLI. (Jonquil.) A tiny, fragrant type, this double all golden yellow variety bears a cluster of 3 to 4 blooms to the stem. The foliage is round like other true Jonquils. L40	1.35	9.00
EARL WILLIAMS. (Barri.) Latest novelty. White perianth of fine symmetrical form, with extending cup of orange-yellow, flaring edge marked deep orange. M95	3.20	23.50

FORTUNE. (Incomparabilis.) This giant in the early blooming Incomparabilis class is outstanding for its size, vigor and free blooming qualities. Fine, flat, overlapping perianth of golden yellow with a cup of the same color, overlaid at the rim with a coppery red-orange glow. Height 2 feet. E. 70c per 3; \$2.30 per doz.; \$16.50 per 100.

FRANCISCA DRAKE. (Incomparabilis.) We cannot adequately describe the beauty of this distinctly new type. The pure white perianth petals are of unusual substance, an inch and a half wide, and tinted gold at the base, which shows through on the outside; the cup, wide and deep, is golden yellow at the base, changing to flame-orange at the densely frilled edge. The flowers are held well above the fine foliage, giving the effect of white seagulls in flight. Strong growing and free flowering. Award of Merit. M. 80c per 3; \$2.75 per doz.; \$20.00 per 100.

Daffodils For NATURALIZING

Suitable for Garden Display,
Woodland Planting, or Cutting

Practically any soil has been found suitable, and they are grown equally well in the open as among trees and in woodland. Contains a mixture of large Trumpets, Leedsi, Barri, and Poeticus types, making a mixture that cannot be beaten for value, and worth much more than we charge for them. Plant at least 8 inches deep, but avoid places where water may collect at any time, as they like drainage. Try to plant before October 15th, or shortly thereafter, but place your order early, as the demand is increasing for these bulbs at this special low price we have adopted. We cannot take orders for less than fifty bulbs. Blooming size bulbs.

Miniature Flowering Bulbs

To brighten up the border, for naturalizing in woodland, or for filling the bare spots in the rock garden, these miniature flowering bulbs are perfect, requiring little care, and establishing themselves without effort.

NEW LEUCOJUM VERNUM

(Giant Snowdrop)

This is an early and most attractive spring flower. Reaches a height of approximately 10 to 12 inches, and bears nodding flowers of white, tipped with green. They should be planted in early fall in a good, well-drained soil, about 4 inches deep, and are especially effective if planted 4 or 5 inches apart, in clumps. They bloom more satisfactorily after they have become well established.

English Iris

This magnificent mixture of bulbous English Iris has been developed at our nurseries, and contains all the choicest varieties which can possibly be had in these fine Iris. The English Iris are a bulbous Iris which bloom in our latitude about the early part of July, and come after all other bulbous Iris. They should be planted as soon after receiving them as possible for best results. They prefer the more moist and heavier soils, and should have good drainage. The blooms of the English Iris are considered to be the finest of any in the Iris class, and each individual bloom is strikingly beautiful, and as cut flowers they are unsurpassed. We are offering them in a fine mixture of colors.

Autumn - Flowering Iris

(Flowering two or more times each season—both spring and fall.)

We take great pleasure in offering this list of the finest fall bloomers in cultivation. While best results are secured with these Iris below the Mason-Dixon Line, with a little care we have obtained excellent fall bloom in Michigan. Some of the varieties listed not only bloom profusely early in the spring, but under favorable conditions also produce crop after crop of flowers in late summer and fall. There are as yet comparatively few of these Iris in existence, and the demand has been so great that we, as well as the few growers of fall bloomers, could fill only a small portion of the orders received last year. Please order early.

\$5.50 per doz.

Lilium, Martagon

This dainty Lily has been off the market since the war. We have been able to contract for a supply from Turkey, where they are native. It belongs to the Tenuifolium class, but has a most unusual purple color, petals dotted with deeper purple. Blooms in Michigan during June. Don't allow the flowers to go to seed, as it weakens the bulbs.

Superior Brand Peat Moss

Nature's Way to a Productive Soil

Plants are living, growing things, and need a congenial environment. This means a favorable climate, and more important still, a correct soil. Soil is made up of two kinds of material; mineral or inorganic; and vegetable or organic. Both are essential sources of plant food, but the organic material (called humus) plays by far the most important part. Peat Moss is the most desirable type of humus known. It is pure vegetable matter that improves soils that are too sandy by giving them body and coherence, and it gives life and porousness to heavy soil.

Superior Brand Peat Moss is excellent as a mulch. A layer of the loose, fluffy material on top of the ground will greatly check evaporation. Applied from one to five inches deep it conserves soil moisture and prevents erosion. In winter it protects plant roots from severe cold.

Superior Brand Peat Moss is sold in bags, each containing two bushels. We will ship by freight, charges collect. Shipping weight of two bags, about 100 pounds. Each bag contains about 2 bushels of Peat. Do not order less than two bags.

From 2 to 9 bags \$1.25 per bag

10 bags or over 1.10 per bag

Peat Moss shipments will commence about June 15, 1948. Please do not ask for earlier shipments as none will be ready before that date.
